New Generation Smart Phone

More Features.
More Compact.
More Style

Thuraya introduces breakthrough technology in its new SG-2520 satellite phone, setting the standard for the world's smartest satellite handset in the industry today.

The new generation Thuraya handset is powerful, sleek in design and comes packed with more innovative features than any other satellite-based product.

With Thuraya's new satellite phone, you can enjoy uninterrupted, seamless, border-to-border satellite telecommunication services in more than 110 nations in Europe, most of Africa, the Middle East, Central and South Asia.

Thuraya's new SG-2520 opens up the boundaries in communication, enabling you to go even further.

Thuraya SG-2520

Thuraya SG-2520 is an advanced "smart phone" using cutting edge satellite technology. Its superiority is reflected in the 3-in-1 integrated technologies handset: satellite, GSM and GPS offering users an unmatched combination of quality and performance.

The satellite service option in your Thuraya SG-2520 allows you to roam with your handset across nearly one third of the globe; from border to border; in urban areas and remote locations providing the advantages of easy mobility and seamless service beyond land-based telecommunication systems. This means that if you are in Thuraya's coverage area you can make and receive calls anywhere in the world. When outside the coverage area, you can also use your phone within a GSM compatible network. The GPS feature in your Thuraya SG-2520 is a powerful tool for navigational and personal security.

Absolute Phone

Thuraya SG-2520 is for people who need satellite connectivity that combine all the new features that come in today's high tech phones. It is indeed an essential communication tool for high profile users in search of performance, personal style and the need for absolute dependability.

With Thuraya SG-2520, a dual-mode satellite phone is no longer a bulky handset to carry around. At 170 grams, it is the world's lightest dual-mode satellite phone, fully equipped with distinctive features such as a built-in camera and a high resolution colour screen.

Sleek and Stylish

Thuraya SG-2520 is sleek in design and its interface can be personalised according to your taste. You pick out a colour scheme, add your favourite images, choose your screen saver, select a ring tone and configure your navigational patterns.

GSM Tri-band

Thuraya SG-2520 is the only satellite Tri-band phone that provides connectivity on GSM mode in all 5 continents. Thuraya's Tri-band GSM feature allows operation on 900/1800/1900 MHz GSM networks offering greater flexibility in high traffic GSM environments with increased phone usability and voice quality in Asia, Africa, Australia, Europe and North America.

GPS Services

The SG-2520 offers superior GPS navigation capabilities that allow users to find locations and reach destinations quickly and safely.

Display

An impressive high resolution, 262,000-colour display [1.9 inch] enables easy viewing of the phone's multimedia applications. The interface resembling a desktop computer allows user-friendly navigation of the phone's functions and services.

Internet Mobility

Thuraya SG-2520 is a GPRS enabled phone that allows access to mobile Internet. This means you can access data and download/upload information using Thuraya's satellite network anywhere in Thuraya's coverage area. You can also enjoy GPRS capabilities in GSM mode.

Camera

The phone's integrated 1.3-megapixel camera, 5x digital zoom allows you to capture special and important moments and let you share them with your family, friends and colleagues as an email attachment or MMS from anywhere across Thuraya network.
